Metamorphosis

# The mouse that roared

## Load/bearing masonry makes it to the top

Used to be, masonry was a mouse. Weak in tension and shear, fine for the low rise, just not up to high-rise specs. Until somebody started looking for a better way to build a wall, found it in reinforced concrete masonry, and wound up with a better way to build a high-rise. The process is simple.

Start with a little better block . . . more cement in the mortar . . . a few bars of steel . . . and a little grout. The steel adds resilience and toughness to the wall . . . the masonry block stiffens the steel and protects it from fire. Suddenly, you have a new structural animal.

No columns, no beams, no forming . . . when you finish, the walls, the structural system is complete. Firesafe, maintenance free, virtually indestructible, and inexpensive. High rise construction was never better.

Which goes to show why masonry isn't a mouse any more. When you have all of this going for you, it's worth roaring about. For more information, contact Masonry Marketing Manager, General Portland Cement Company.

CONDITIONS,”**

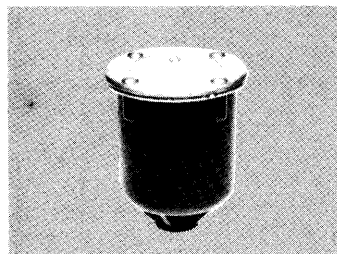

# **VERSATILE IRRIGATION EQUIPMENT**

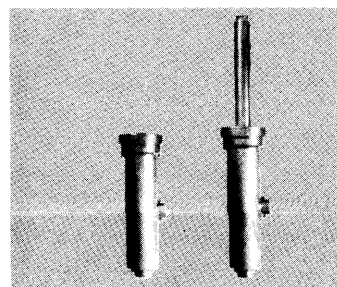

Rise N' Rain 700. All moving parts accessible without excavation or disconnection.

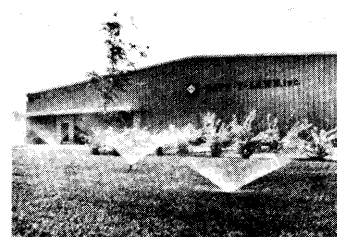

F-250 with exclusive patented support flange, sealed main bearing trajectory adjustment 9° to 25°

P-200 with sealed bearings — fully adjustable

GL-71 Pop-Up Sprinkler, flush installation permits grass to grow over unit.

**When you're faced with irrigation projects that demand the highest quality and performance, check these features of the Safe-T-Lawn products.**

- ☐ Especially engineered with sealed bearings for bad water and sandy conditions.
- ☐ Made of specially formulated, non-corrosive, long lasting, light weight materials.
- ☐ Complete line for wide variety of uses including golf courses, highway median strips, athletic fields, parks, cemeteries, tennis courts, residential.
- ☐ Better coverage and directional control through completely adjustable nozzles and angle of throw.
- ☐ Easy installation with side entrance and easy replacement or repair in the ground.
- ☐ Backed by complete engineering department to aid in layout when required.
- ☐ World wide distribution — nation wide warehouses for fast, economical shipment.

For detailed information and help with your toughest irrigation problems, write or call:

Area Code: (214) 350-2458

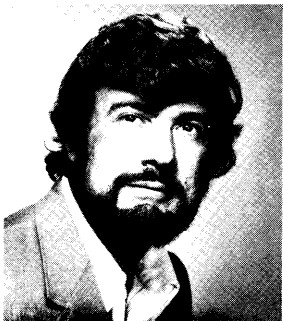

Negroponte's description of the program is in the form of questions. Metamorphosis of practice? For the one year salary of a draftsman you can buy a computer and a display. Will this change the practice of architecture? Will this move the small office into frontiers previously manageable by only the largest firms? What do you need beyond a computer and a display.

**NICHOLAS NEGROPONTE**

The architect's concept of himself is influenced by the emotional and physical climate in his work setting: the norms operating in the firm; his social interactions with peers, authority figures and clients; his ability to influence others as well as to be influenced by others.

**JOHN H. SUEHR**

The use of cognitive and feeling imagery as a creative process can improve architectural design. The innovative architect will find, as he experiments with problem solving images, new perspectives on project objectives and methods.

**WILLIAM HINDS**

The entire subject of cost control is probably the most timely, troublesome and controversial problem area in today's A/E office. There are many people including Mr. Early who are convinced that the future role the Architect will play in the building process is going to depend to a large extent on how effectively the Profession is able to meet the tough cost control challenges found in today's marketplace.

**W. COLE EARLY**

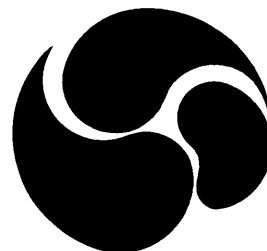

WOLF VON ECKARDT is the architecture critic and an editorial writer of The Washington Post.

In 1972, Von Eckardt received the Architecture Critic's Medal of the American Institute of Architects for "both a high level of architectural expertise and an acute sensitivity for the social needs that our environment must satisfy".

**WOLF VON ECKARDT**

METAMORPHOSIS will provoke thought about our changing profession.  
A changing profession is marked by the push and pull of new ideas which work to hammer out shapes that truly reflect society.

## PPG's Total Vision System™ in the new AIA Headquarters gives you an unobstructed view of 1799.

The new AIA Headquarters Building shares the site of its historical counterpart, The Octagon House, to make a contrasting but complementing architectural statement.

Focal point of the new structure: a two-story Total Vision System by PPG in the center of the plan.

This totally transparent section integrates reception area, a grand staircase, and second-floor social gallery without seeming like an enclosure.

It also unites indoors and outdoors. The brick-paved lobby suddenly becomes the brick-paved terrace and Octagon House garden—creating a magnificent open feeling.

With no obtrusive metal.

You see, the major windload supporting elements in a Total Vision System are  $\frac{3}{4}$ -inch clear annealed float glass mullions. Unobtrusive aluminum sections frame the system at head, jambs, and sill. When installed, these sections, along with the black structural adhesive, seem to disappear.

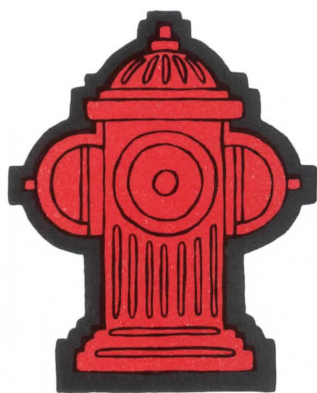

Total Vision Systems are available as a single-source construction package from PPG. Complete information on glass recommendations, installation techniques, glazing details, test results, and other data is contained in the TVS™ Data Folder. Contact your PPG Representative or write PPG Industries, Inc., Environmental Glass Sales, One Gateway Center, Pittsburgh, Pa. 15222.

# SPECIFY NON-COM FIRE PROTECTED WOOD

...and you've got yourself  
a built-in fire hydrant

Architect or contractor — when you're in the building business every safety precaution counts. Specifying NON-COM fire protected wood assures your projects added fire protection. Top quality protection that comes from pressure treating the wood the way Dantzler does to produce NON-COM wood.

NON-COM wood actually *releases water vapor* and non-combustible gases, impregnated in the wood during pressure treating, rather than the flammable gases and tars normally released by non-treated woods.

At Dantzler, we like to call it a built-in fire hydrant. It's just one of the many safety components of NON-COM wood that has helped it earn the Underwriters' Laboratory label.

Specify NON-COM, for safety's sake.

**non**   
**com**®  
FIRE PROTECTED WOOD

NON-COM IS PRODUCED BY **DANTZLER LUMBER & EXPORT COMPANY**

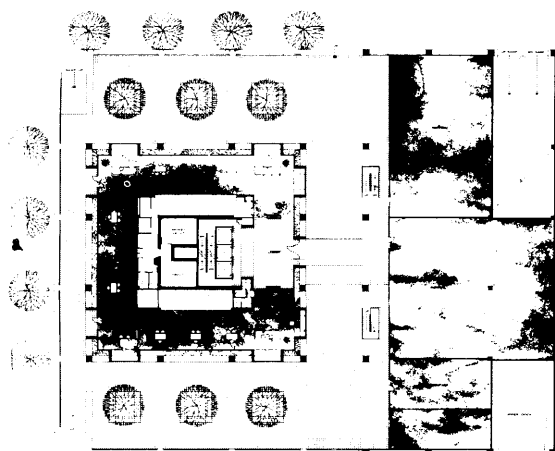

P.O. Box 6340, Jacksonville, Florida 32205 • Telephone: (904) 786-0424 or 781-1853 • P.O. Box 1419, Pompano Beach, Florida 33061

For more information about non-com® Fire-Protected Wood, write Dantzler at Jacksonville Headquarters

*Herbert H. Johnson and Associates, Inc.*  
*Architect*

PLAZA LEVEL

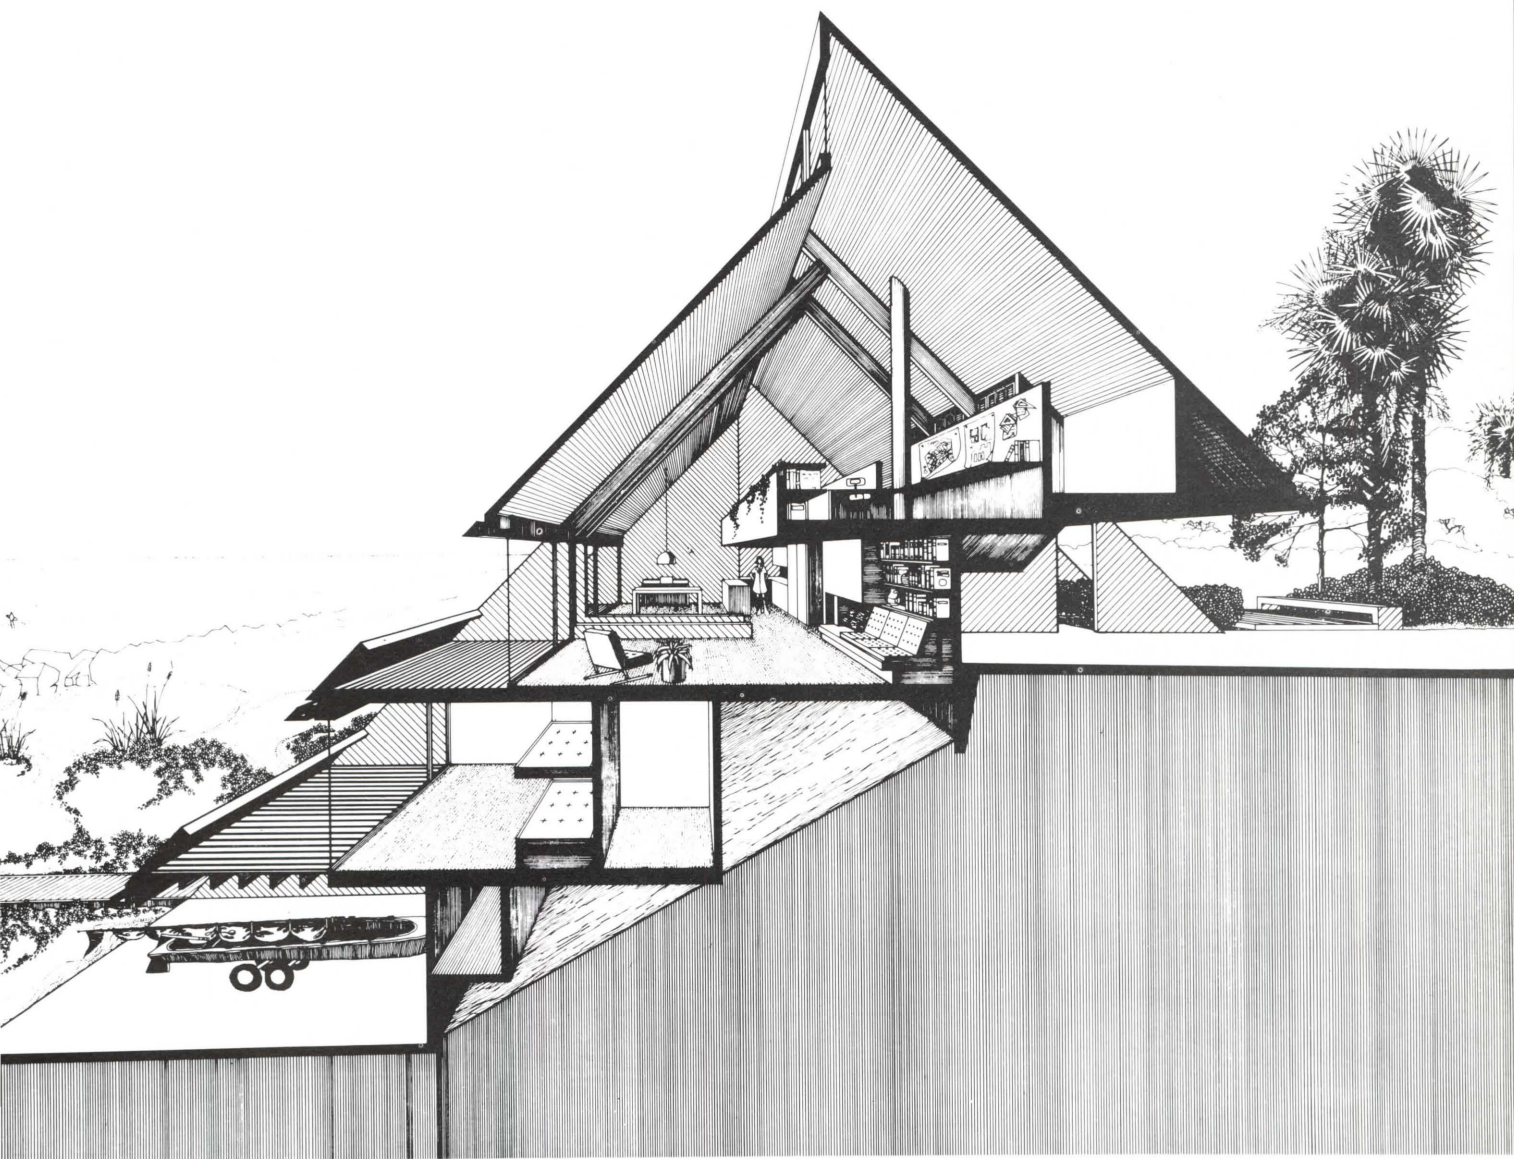

Well related parking structure to main building and connecting plaza.  
 Honest simplicity of structural system and form.  
 Well designed core.  
 Well handled entries.  
 Well handled and very excellent detailed interiors.  
 Strong, direct and simple.

**HONOR  
 AWARD**

PHOTO: ALEXANDRE GEORGES

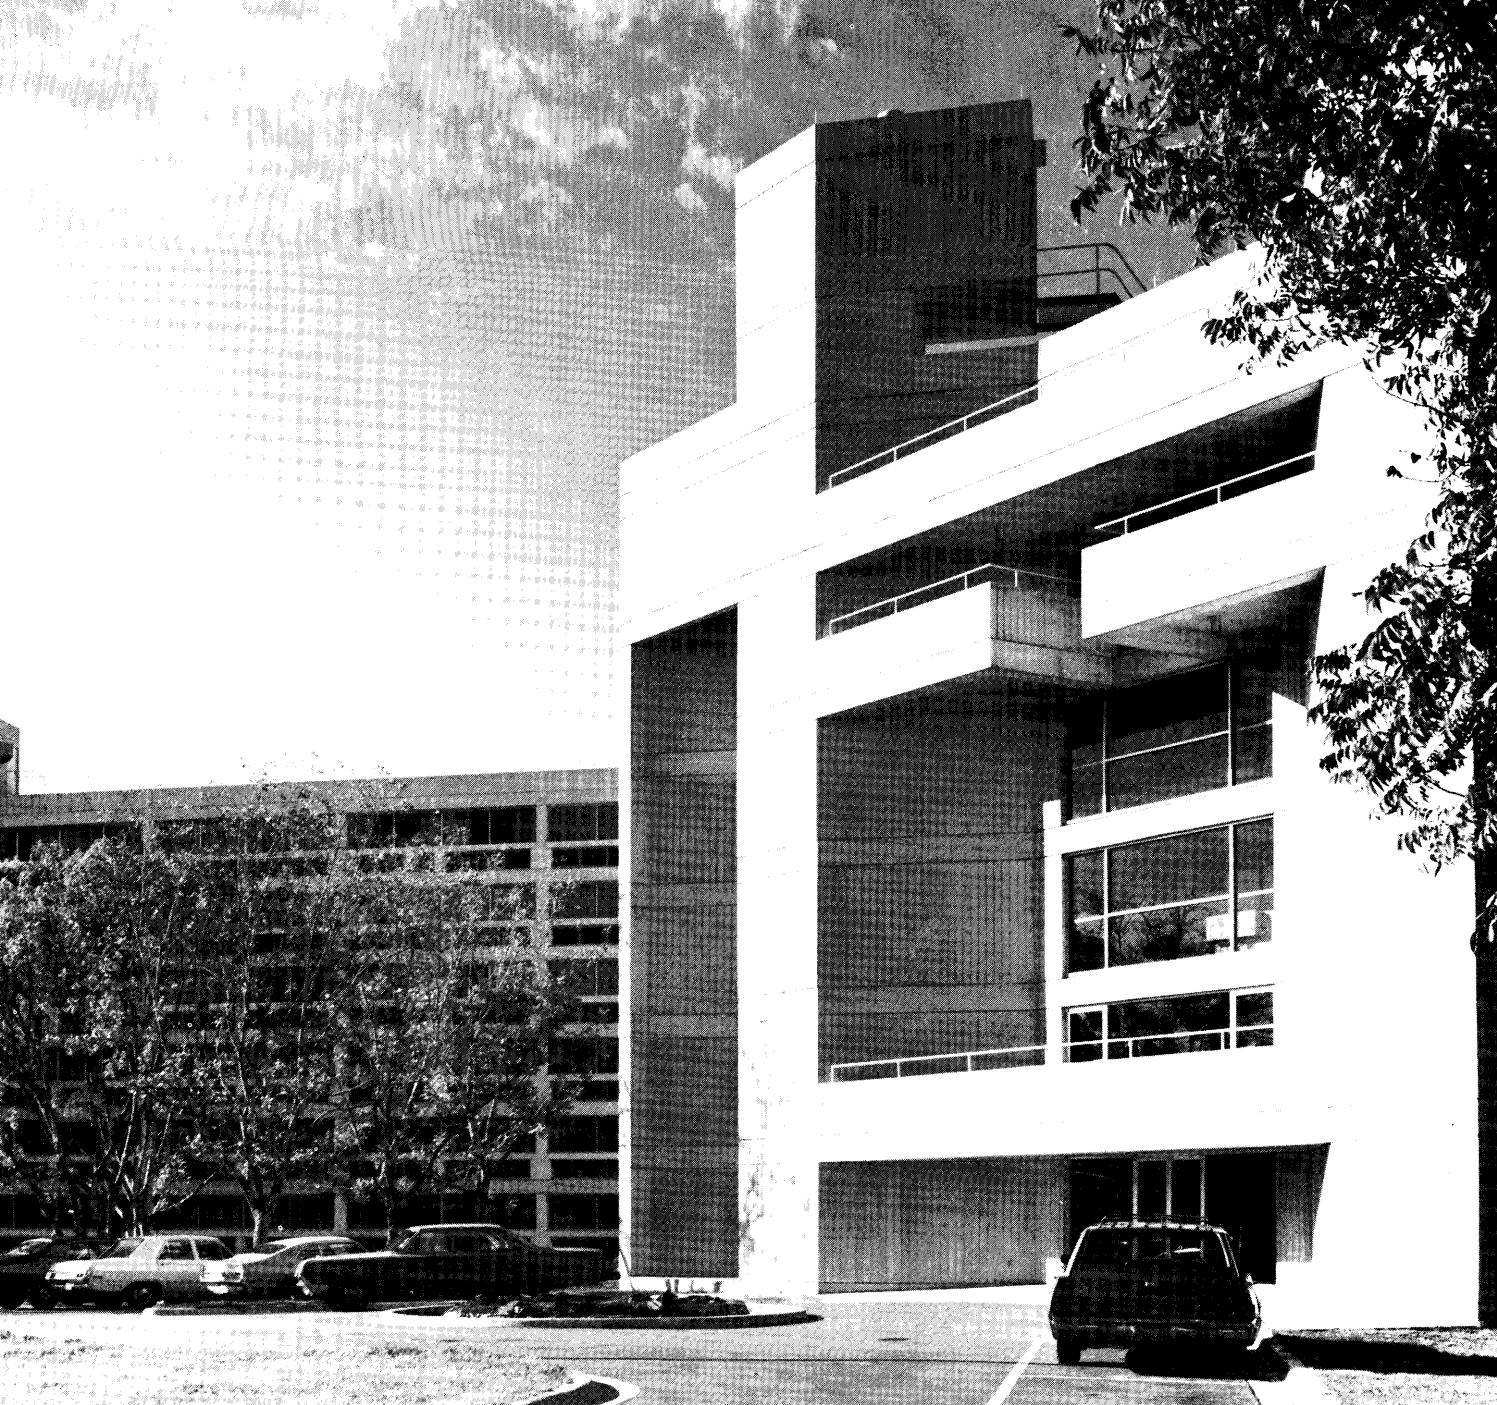

*Morgan Residence/Atlantic Beach*  
*William Morgan, AIA/Architect*

Strong geometric forms.  
 Excellent relation of building form  
 to site.  
 Great structural order.  
 Excellent use of simple materials.  
 Symmetry without being forced.  
 Exciting dramatic interior spaces  
 with each having a commanding  
 view of the beach and ocean.

**HONOR  
 AWARD**

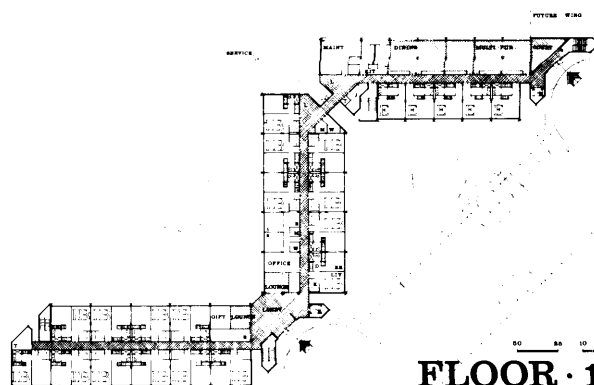

Excellent solution under the restraints of Hud 236 program. Exterior detailing excellent. Scale relates well to neighborhood. Jury applauded the division of the building into three smaller more human scaled elements. Questioned suitability of type of lounge furnishings as related to the elderly. Jury would liked to have seen the interiors of living units.

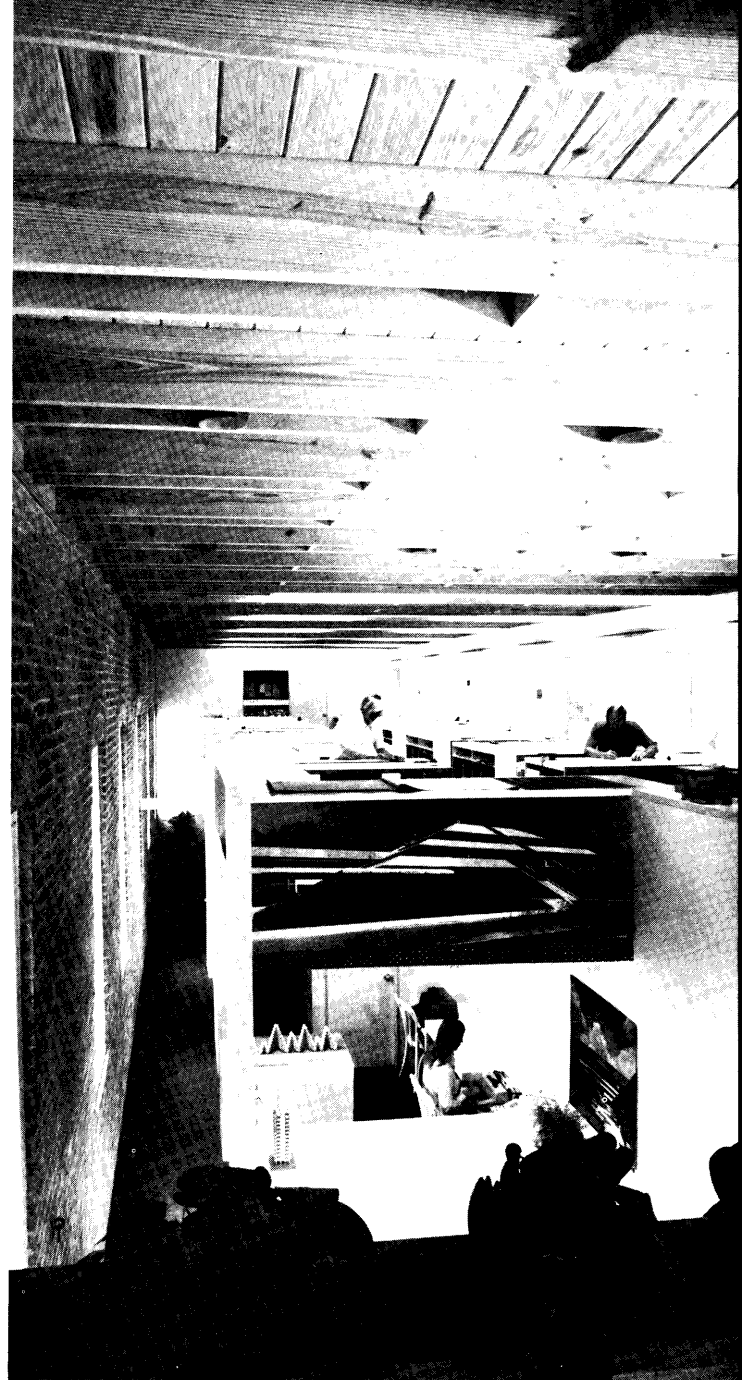

**MERIT  
AWARD**

**FLOOR · 1**

*Professional Offices/Jacksonville*  
*William Morgan, AIA/Architect*

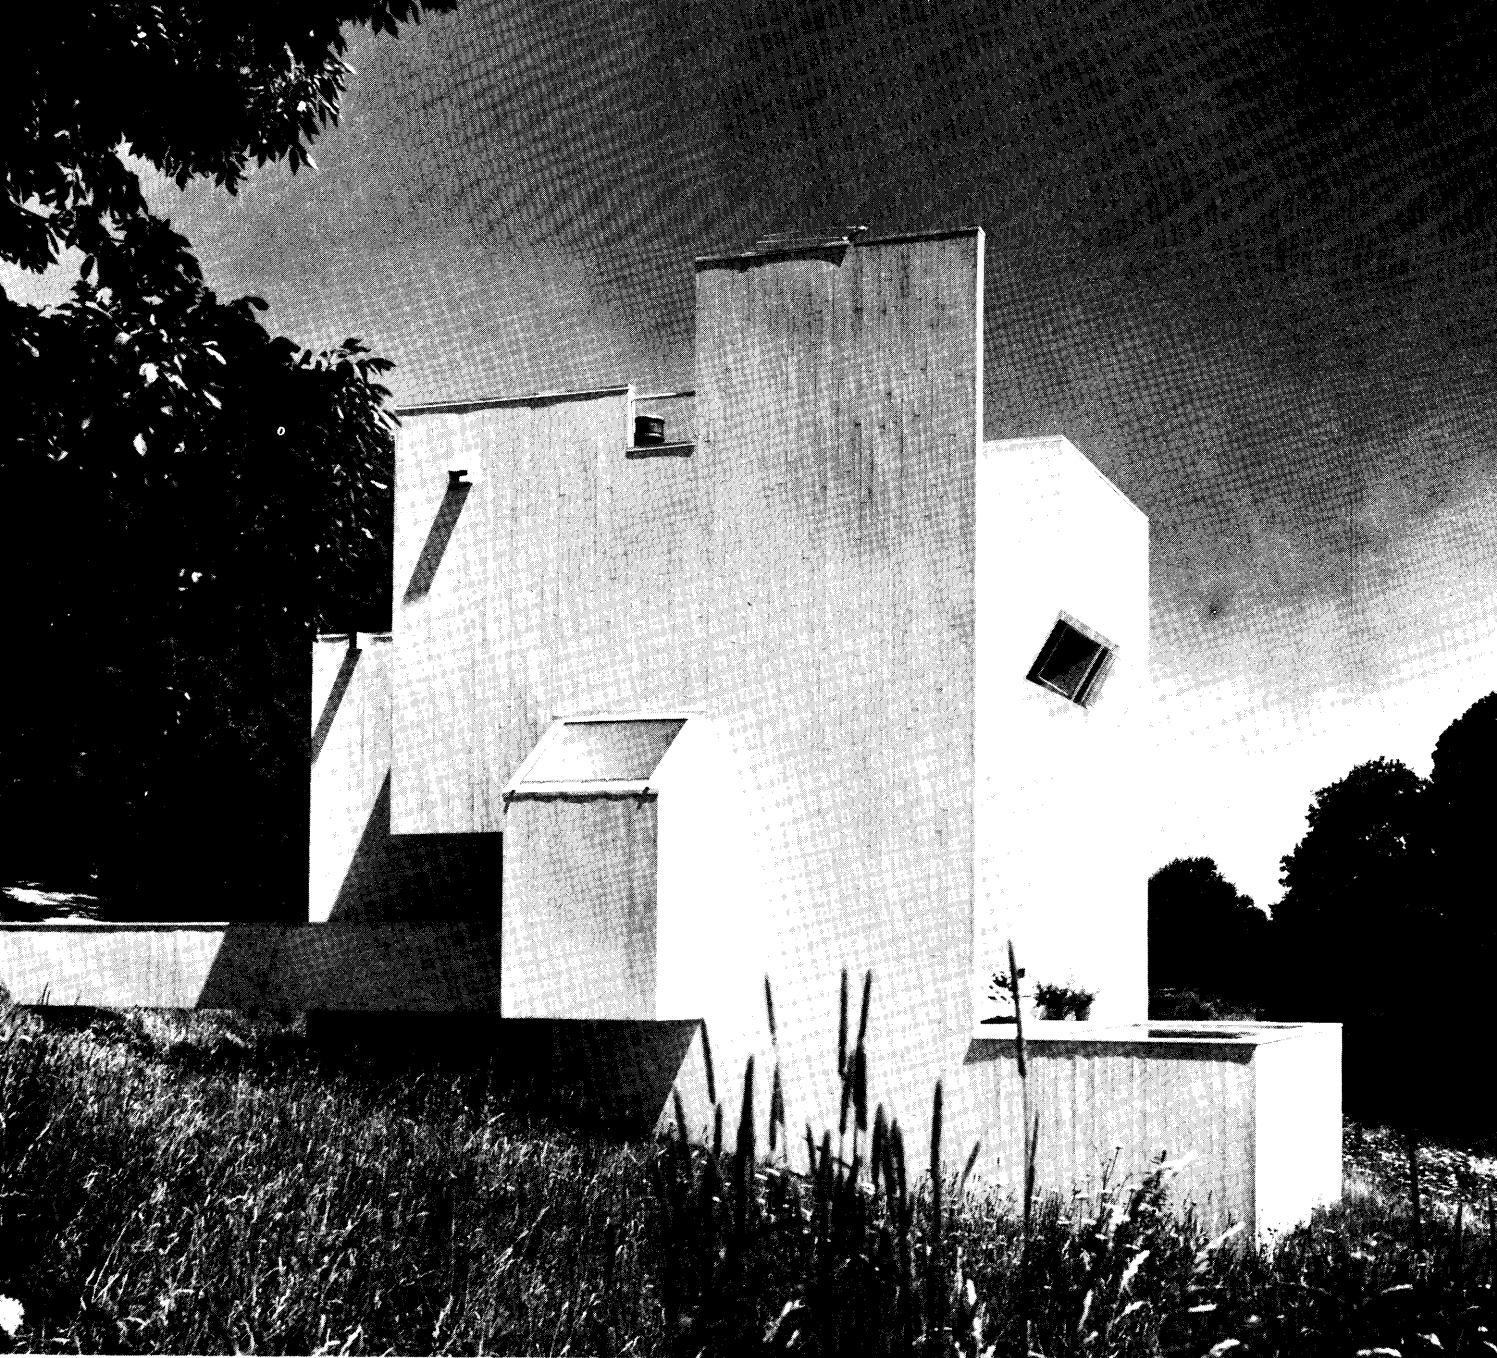

MAIN FLOOR

Handled with restraint, faithful to original structure.  
 Incorporation of existing materials, brick and wood into a contemporary design.  
 Jury impressed by simplicity.

**MERIT  
 AWARD**

PHOTO: RONALD THOMAS

Pristine, bold geometric form.  
Interplay of solid, void, light and shadow.  
Good spatial relationships.  
Bold concept expression.  
Jury liked attached outhouse form on second floor, found it suitable and functional.  
Jury questioned exterior material. The similarity between masonry, concrete and/or stucco.  
Form indicates material other than wood.  
Weathering and maintenance questioned.

*Engle Residence/Boxborough, Mass.  
Robert Whitton, AIA/Architect*

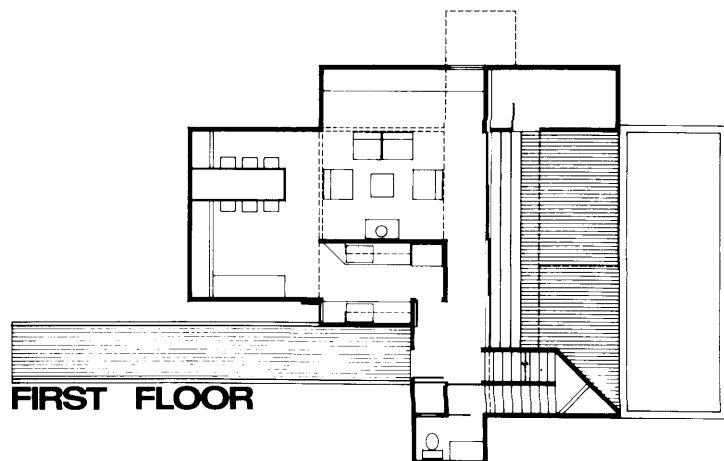

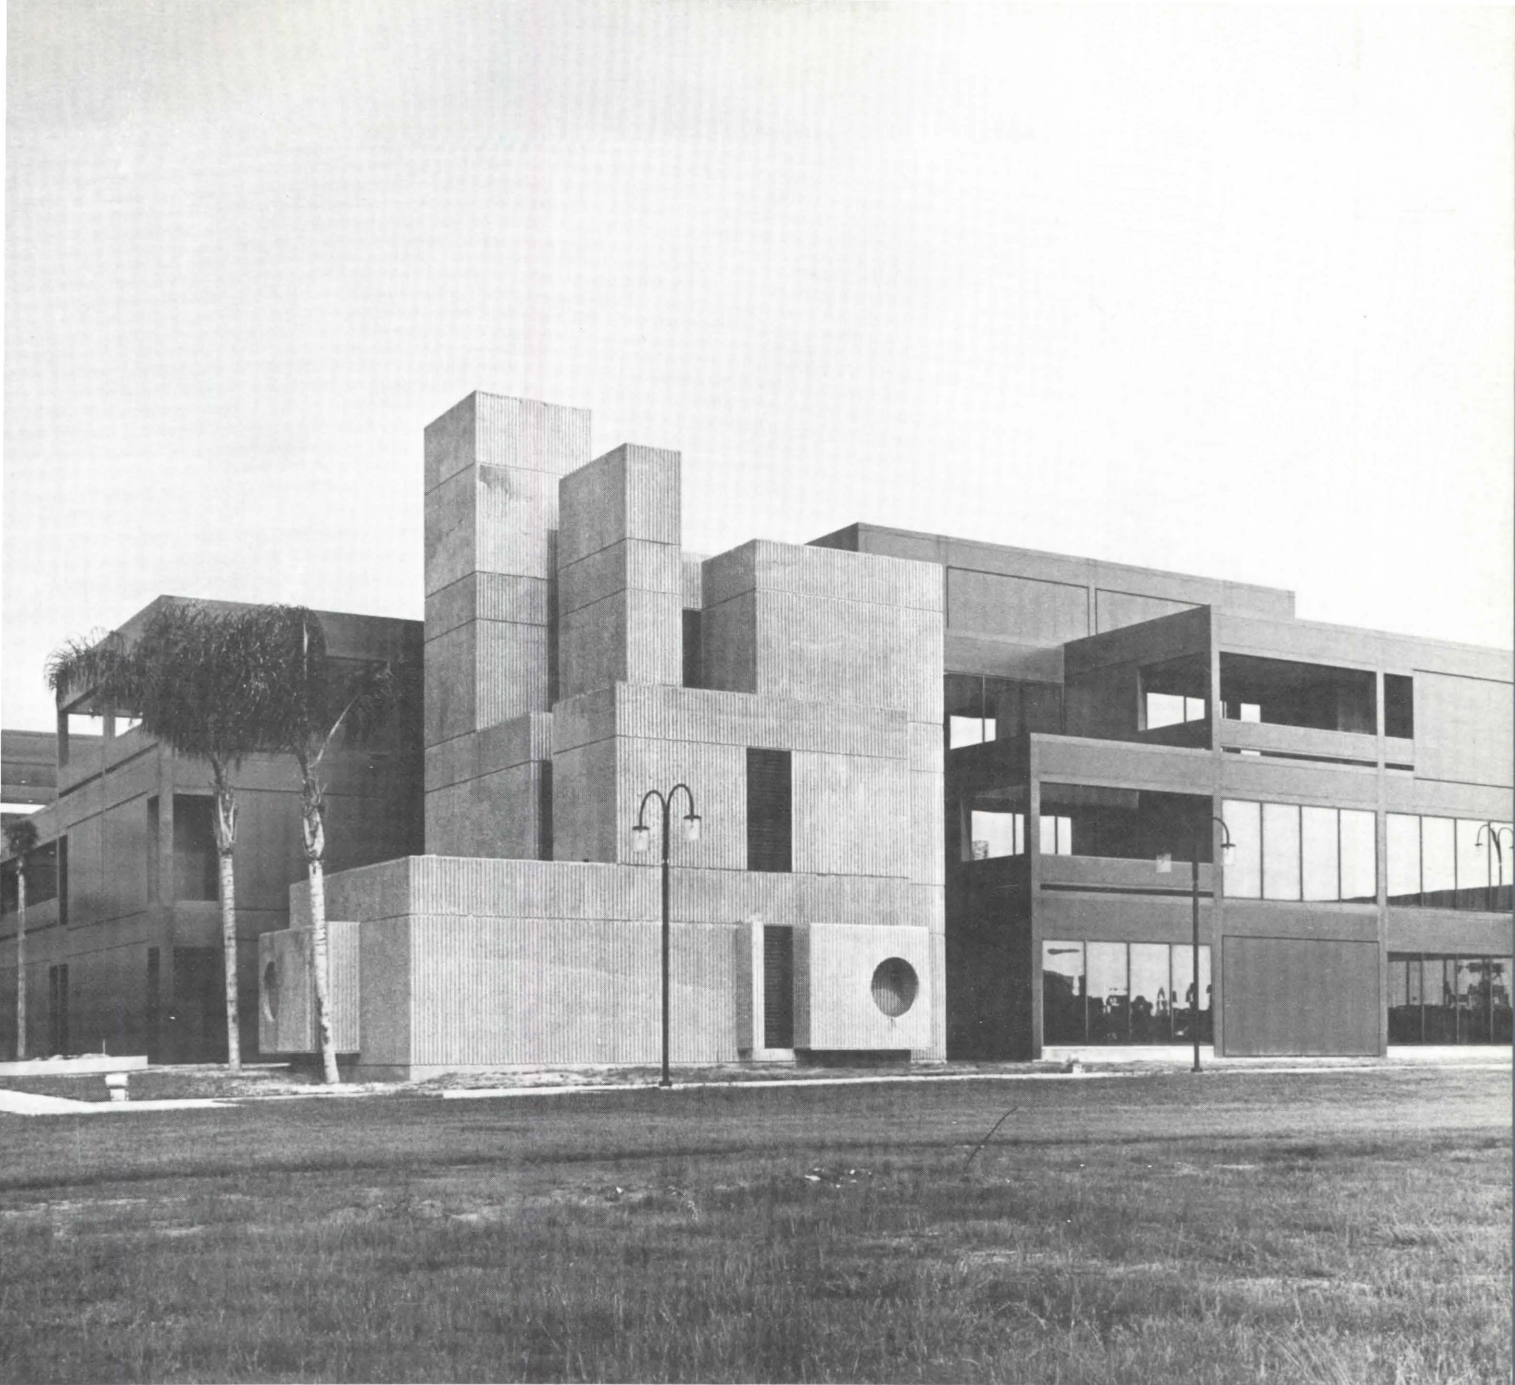

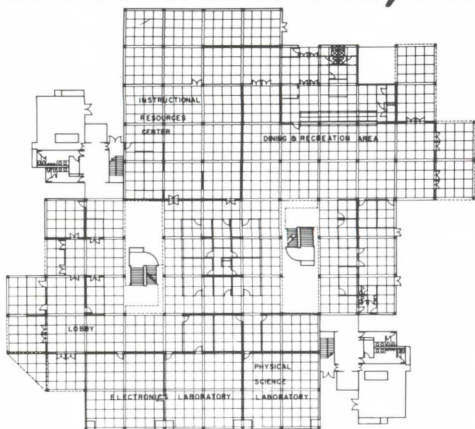

PHOTO: EZRA STOLLER

**MERIT  
AWARD**

*Dale Mabry Campus  
Hillsborough Community College  
Robert Wielage, AIA &  
John J. McKenna, AIA/Architects*

Highly flexible solution to a changing program.  
Good modular control in planning and resulting forms.  
Good expansion capabilities.  
Reason for concrete forms is not clear and questionable.  
Jury regretted lack of contracting forms from metal to concrete elements.  
The interior stairs, form and materials are questionable and inconsistent.

**MERIT  
AWARD**

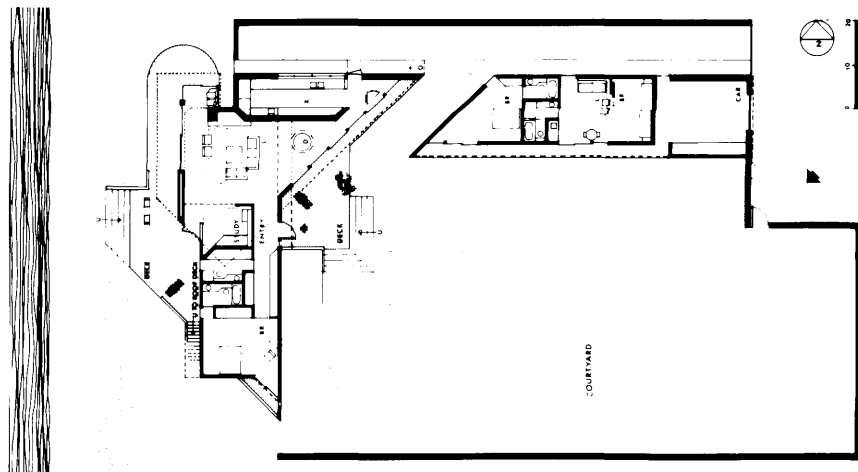

Forms relate well to site.  
Forms and materials relate well  
to beach.  
Minimum use of materials for  
maximum unity.  
Low maintenance.  
A free and easy fun house.

**MERIT  
AWARD**

PHOTO: WADE SWICORD

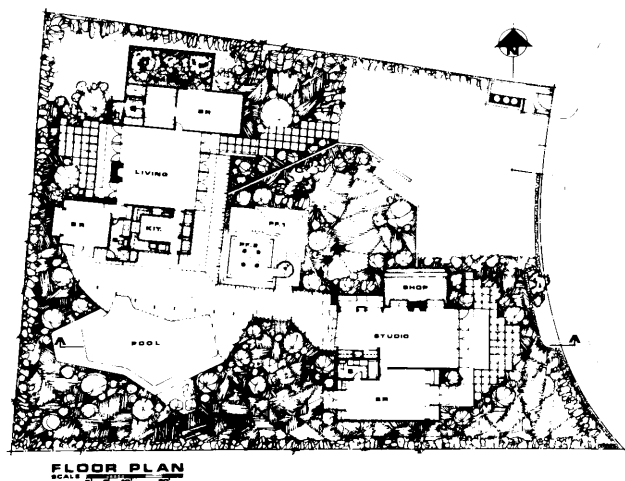

## *Weld Beach House/Sarasota* *Carl Abbott/Zoller-Abbott Architects*

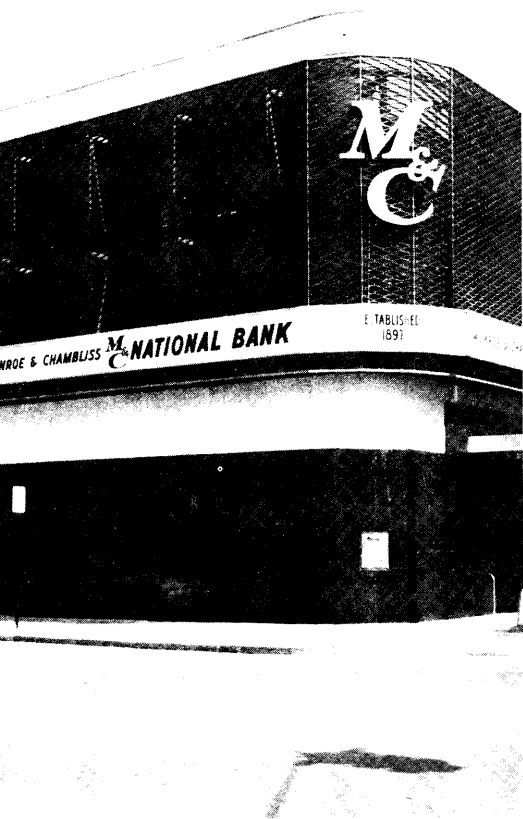

*Walter Goodman Residence/Miami  
Charles Harrison Pawley, AIA/Architect*

Total site, building, landscape well unified.  
Good solution of working within the original forms.  
Questioned expense of total remodel solution.  
Jury thought too busy in exterior detail.  
Jury regrets that tree house is not complete.

PHOTO: WRAY STUDIO

**HONORABLE  
MENTION**

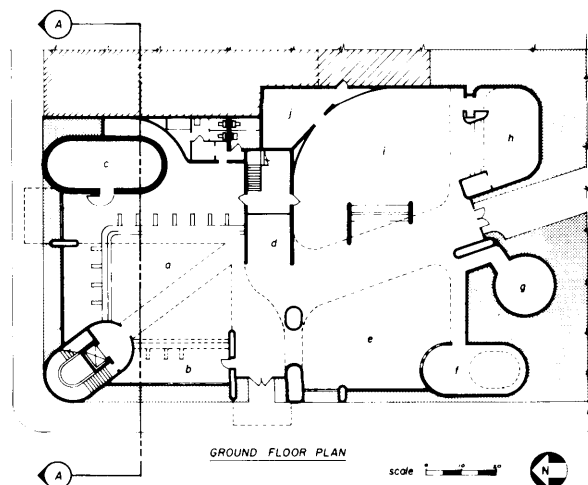

A very successful remodeling project with use of few materials, resulting in strong unified exterior and interiors. Excellent interior — all well unified. Abundant use of curve linear forms seem somewhat arbitrary. Jury unsure of what was old and new.

**HONORABLE MENTION**

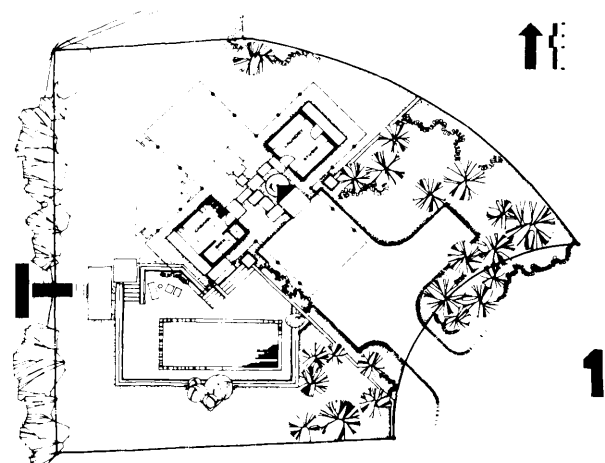

*Barnett Bank of Ocala/Ocala*  
*Hal T. Reid, AIA/Architect*

PHOTO: ALEXANDRE GEORGES

*Gibbs Residence/Key Biscayne  
George F. Reed, AIA/Architect*

Good tropical feeling in forms  
and materials.  
Well suited for its environment.  
Rustic elegance.  
Will weather well.  
Comfortable and warm.  
Jury liked lookout tower.  
Jury questioned relationship of  
45 degree angled pool to main  
structure and site.

**HONORABLE  
MENTION**

# splendid graphics

Individual identification through a coordinator and Distributor of Architectural Graphics.

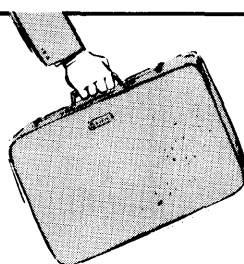

Offering our clients the newest processes and the finest products for the assurance that the graphics for your project, whether one door or a whole airport or hospital complex, compliment your overall design and environment.

With capabilities such as Best "Graphic Blast", die-cut-vinyl Super Graphics, Directories, cast aluminum, bronze or other metal exterior graphics, we can work to your specifications or assist in a coordinated design that provides your clients, and their customers, a sense of assurance and an ease in total environment.

May we consult with you regarding a specific project or our potential. Let us create samples for submission to your clients for that coordinated-design appearance on your next project. No obligation, of course.

## What happened to your company's investments while you were in a conference a few hundred miles away?

Do you really have the time to keep up with the status of every one of your company's investments? Are you available to take advantage of crucial developments in the market? Or are you tied up in an out-of-town conference?

If you can't always be on top of your investments, you really need somebody who can be. You need us, Atlantic Investment Advisers, just as you need your other high level assistants and professional consultants. We are equipped to manage investments for pension and profit-sharing funds, trusts, investment advisory accounts, foundations, governmental units and charitable organizations.

Our job is knowing what most people cannot possibly spare the time to learn. Our staff of trained investment personnel research opportunities in the investment market. For instance, we look for those companies which have quality and depth of management, a strong underlying growth trend, competitive expertise in world markets, and well controlled costs.

Consider the advantages you'll have by letting Atlantic Investment Advisers be responsible for investing your company's money in a program tailored specifically to its needs.

And consider the time you'll probably gain! Time you may want to use to concentrate on other pursuits.

ATLANTIC INVESTMENT  
ADVISERS, INC.

Call for an appointment, (904) 791-5151. Or, for more information, write to Mr. William R. Ennis, Atlantic Investment Advisers, Inc., West Bay Station, Jacksonville, Florida 32203.
